# RULES OF THE JUNGLE

Monkey see, monkey do, right? Good, 'cause I've got some important information for you, fellow monkey!

First of all, what you're about to read is meant to be informative only and I'm not here to persuade you to buy any crypto currencies, be they tokens or NFTs.

Secondly, should you decide to ape in (hehe) and buy some of our tokens or NFTs, you'll accept that we are in no way responsible for any potential losses you may incur. In other words, any monkeying about you do, you do at your own discretion.

Got it? Good, carry on then!

# INTRODUCTION TO THE WILD

But enough about the legalities and other boring stuff! Now, as you know, everybody likes to talk about themselves and so do me and the rest of the boys! So what are "ApeBoys" anyhow?

We're a project (who would have guessed?) aiming for long-term success in the Blockchain Gaming and NFT industries. Our core group consists of a marketing expert, Steve; a blockchain developer, Moon Dreams; and a game developer.

Our long-term goal is to create a Gaming Universe with multiple addictive blockchain based games with NFT integrations and P2E functionalities in place.
